## RECOUNT SHOWS

### ALBERT WREN ELECTED BY 47 VOTE MAJORITY

Albert Wren, Liberal-Labour candidate in the June 11th election will represent the Kenora riding in the Ontario Legislature for the third time. Wren's re-election by a majority of 47 votes was made official this morning when Returning Officer J. O'Flaherty released the official figures of the recount held in Kenora Monday.

Final figures are as follows:

WREN - Liberal-Labour ..... 6,589  
KEFFER - Progressive Conservative .. 6,512  
SHERMAN - Labour CCF ..... 1,512

The Kenora seat has been in doubt since the election. At the first tabulation of votes at the close of polls, Wren led by four votes. The service vote and official count boosted his majority over Keffer to 34.

The re-count was asked for by Mr. Keffer and was held in Kenora with Judge L. A. McLennan presiding. The tabulating of votes started early Monday morning and concluded at 11:10 the same evening.

The final figures showed a net gain of 49 votes with 29 for Wren, 16 for Keffer and 4 for Sherman.

This last election marks the third time that the results of the Kenora riding have not been officially known until long after voting day. In each case too, there have been recounts. In 1951, Mr. Wren won by 147 votes in 1955 by 128 votes and this year his margin was 34 votes.

### Lake Level Starts Upward Climb

The level of the Lake of the Woods started its annual climb today with the level standing at 1058.92 feet above sea level compared with 1058.71. Monday, Wednesday it is expected the level will be over the 1059 foot mark for the first time this year.

The first three weeks in July of 1958 was the only time in the whole year that the level came up. January of '53 it was 1050 feet, March showed 1056.95. July the lake came up six inches, then continued to drop again till it reached 1057.47 feet, January of 1959.

Last night's rainfall amounted to .12 inches.

### Longbow Project Casualty Of Friday's Rain

Longbow Lake is still recovering from Friday night's deluge which dumped over five inches of rain on the area. Latest casualty to the storm is the Department of Public Works.

A month ago a start was made on a permanent dam between Longbow and the Lake of the Woods. A 100 foot coffer dam was completed Friday and cribbing was built ready for the start on Monday morning of concrete.

Then came the rains - 5 in-

ches Friday night and another inch on Saturday. The lake level shot up an estimated 3 feet. Docks were flooded, beaches became lost. Orders went out to break the coffer dam and lower the water level 39 inches. Instead of pouring cement, workmen set off dynamite charges to breach the mud and stone coffer dam.

"I think you can estimate safely that 1,000 cubic feet of water per second is racing through that opening", the foreman told the Miner and News yesterday. "At the present rate I expect it will take 6 days to drop the lake level the required 39 inches."

The level of Longbow hit its peak just before noon on Monday. However a lot of water is still being fed into the lake from the many streams and workmen stated that if the coffer dam had been opened, the level was expected to climb at least another 8 inches.

### Junior Rangers Airlifted To Posts

Twelve Ontario high school youths—part of more than 600 chosen to attend Junior Forest Ranger camps — this morning were airlifted to Black Sturgeon Lake from the Lakehead.

Employed by Ontario Department of Lands and Forests they will spend summer vacation combining sports and recreation with forestry and woodcraft education.

Department trucks also drove 25 rangers to Sibley Provincial Park for clearing and improving camping areas, thus releasing experienced personnel for fire control.

Majority of the youths are from Eastern Ontario. The Department policy is to employ them in other districts to expand their woodcraft knowledge.

Junior ranger camps in this area are located at Shebandowan, Black Sturgeon and Sibley, Fort Frances, Geraldton and Kenora.

Local rangers are usually employed in eastern Ontario.

ALBERT WREN

### Bridge Traffic At International Falls, Sets Record

International Falls — Inward bound traffic from Canada across International Bridge for June set new records, Immigration Officer Charles Johnson said today.

The number of Canadians making the crossing was 33,209. United States citizens returning to this country were 51,809. Planes entering from Canada numbered 310.

Figures for June, 1958 were: Canadians 29,764; U.S. citizens, 45,411, and planes, 299.

Total increase in people crossing was 9,934 and there was an increase of 11 planes.

### Lions Club To Supply Swimming Supervisors

The Kenora Lions Club announced today that they have instituted a program of water safety in conjunction with the Red Cross.

The Club will have qualified swimming instructors on hand at Coney Island Beach, Keewatin Beach and Rabbit Lake who will take over when the Red Cross instructors are not on duty. These instructors will serve till the end of the swimming season.

The Lions Club has also roped all swimming areas for the safety of swimmers. The full cost of this project is in the neighborhood of \$2,000 and is entirely financed by the Lion's Club.

The Lion's ask the co-operation of all in obeying the safety rules, staying off the floats outlining the swimming area and also they ask all to refrain from throwing bottles in the water.

A bicycle can be a dangerous vehicle if it is not kept in good order. Wheels, brakes, handlebars, tires and chain should be in good repair. A lamp in front and a reflector at rear will contribute to the bike's safety.

No child between the ages of one and five years should be allowed to wander out of the house alone. Toddlers who can get around quickly are not able to judge the danger of traffic, if they reach the street.

A wide variety of foods is the basis of good nutrition, to ensure that the meals are well balanced, with adequate amounts of protein, minerals and vitamins. Canada's Food Rules should be followed for the wise choice of food.

### NATIONALS WIN 5-4 ON 2-RUN, 8TH FRAME RALLY

A two-run rally in the 8th inning, sparked by a tremendous triple by Willie Mays won the first of 1959's two all-star games for the National League this afternoon. The contest was played in Forbes Field, Pittsburgh before a capacity crowd of 35,000 fans. Vice president Nixon was in attendance and threw out the ceremonial ball. The final score was 5-4.

Eddie Mathews homered for the winners as did Al Kaline for the American leaguers.

### Call of the West Lures Lady and Plug

This could be a social item, Audrey Goodchild, Bill and Jade, stopped in Kenora today enroute to the coast - but Audrey is a registered nurse, Bill is a ten year-old Belgian horse and Jade a German shepherd dog and they are on their way to British Columbia. When they get there, Bill will have covered more miles "on foot" than anyone has for a long time.

It's a long story and a long slow way of reaching the west coast, but it's also a different mode of travel. Miss Goodchild, formerly employed in the driver's seat of an ordinary milk wagon is being pulled by Belgian Bill at the rate of twenty miles a day.

The trip or sometimes endurance test, is a result of Miss Goodchild wanting to write a book and see the country. She came to Canada two years ago from Sussex, England. After nursing in the Hamilton and Brantford hospitals, she saved enough money to buy her horse, wagon and dog. She started out from Galt, Ontario a year ago and arrived in Port Arthur a distance of 1,003 miles last October. She nursed there until three weeks ago when she started out again reaching Long Bow Lake last evening. It takes approximately a week to travel 120 miles, since Sunday is Bill's day off.

The horse is very hard on shoes, states Audrey and I must have him shod every two hundred miles. Blacksmiths are also hard to find. I do carry shoes for my horse, she continued but I hope I never have to shoe him.

Miss Goodchild sleeps in her wagon which is made of aluminum with rubber wheels; but this poses rather a problem too, since she must carry hay and oats for her horse as well as food for her dog and herself.

An amazing angle of the whole trip is that Miss Goodchild is scared of her horse. She stated that he is very difficult to lead and requires a heavy bit in his mouth. Things were rather bad for her from Fort William since they have encountered construction workers and the horse doesn't like those "big yellow machines." Miss Goodchild expects to make much better time on the prairie and expects to spend the winter in Alberta.

In the spring, her sister is coming out from England to accompany her to the coast. After writing her book, Miss Goodchild then expects to travel back across Canada by rail and then sail for her home in England. Naturally Bill and Jade are going, too and Bill in particular will appreciate the return trip by train.

Plan Your Photos To Avoid Errors

Invited to a friend's or relative's wedding. Here are a few tips on taking better wedding pictures. But first, don't suggest that the prospective bride and groom needn't hire a professional.

Wedding photography requires a great deal of practice and skill. If you offer your services—and you're accepted—you're in the uncomfortable position of having to deliver the goods.

Begin by shooting pictures of the stag party. Chances are a professional photographer won't be on hand.

Take a few shots of the future groom washing and polishing the car. You can also take some shots—staged in advance—of both parties packing their suitcases.

Be sure to attend the wedding rehearsal. Be on the lookout for the best vantage points for taking pictures. Ask the minister, priest or rabbi for permission to take pictures during the ceremony. He may not object if you don't use flash.

Don't Need Flash You don't have to use flash with some of the fast black and white films. Take your exposure meter. But indoor color will need to be used with flash.

If you can manage it, drop around at the bride's home and get some pictures of her bridesmaids helping with her wedding veil. Then rush to the church.

As the bride leaves the family car in front of the church, be on hand with your camera. But don't get in the way of the professional. He's being paid to do a job. Help him by not popping up under his elbow every time he's about to take a picture.

Before the ceremony starts, take exposure meter readings of the palm of your hand in a different positions in the church. In this way, you'll know the necessary exposures without having to stick a meter in the bride's face when she arrives.

Good Planning Be inobtrusive. Based on the picture plans you made during the rehearsal, you'll be able to shoot the bride as she comes up the aisle. Then stand to one side and shoot lots of pictures during the ceremony.

You can afford to overlook the register-signing ceremony. This is usually done in a tiny anteroom. There won't be enough room for the wedding party, the professional photographer—and you.

Take this opportunity to shoot a few shots of the guests. Then walk down the aisle and pre-focus on a spot where you'll photograph the bride and groom as they leave the church.

On the church steps, use a slightly slower shutter speed to record the thrown confetti as a blur.

At the reception, take pictures of the toasts to the bride. Move in good and close for this one. Take a close-up of them cutting the cake. If you are using flash, calculate your exposure carefully so you won't wash the detail out of the white cake. It might be a good idea to diffuse the bulb with a clean handkerchief.

Just before the reception is over, photograph the car being decorated.

Fish hooks made in ancient times of bronze, copper or stone were much the same as hooks now being manufactured.

Kitchen Classics

SUPPER SOLUTION

Here's a simple casserole idea for lazy summer days... a delectable mixture of tuna fish or flaked cooked fish, tastefully blended with crisp chopped vegetables, peppery seasonings and a "sauce" of mayonnaise. Mix it all in the cool of the morning—there's no cooking at all at this stage—and store in the refrigerator until shortly before dinner. Then top the savory mixture with buttered soft crumbs and

heat in a moderate oven along with a French loaf or rolls. While the main dinner item is heating, complete the menu line-up by tossing together a crunchy salad of fresh garden vegetables and a light French dressing. There's no dessert problem either if chilled fresh fruit and tall tinkling beverages are served.

SUMMER TUNA TREAT

1 large green pepper, seeded and chopped
1 medium onion chopped
1 cup diced celery
2 cups tuna (contents of 2, 1/2 lb. cans) OR 2 cups flaked cooked fish

3/4 teaspoon salt
1/8 teaspoon pepper
1/2 teaspoon Worcestershire sauce
1 cup mayonnaise
1 cup buttered soft bread crumbs.

Lightly mix together all ingredients except bread crumbs. Place in greased casserole (medium size, 5-cup or 6-cup capacity). (If not to be heated immediately, store, covered in refrigerator. Remove about half an hour before placing in oven so casserole dish won't break on heating. Sprinkle top with buttered bread crumbs. Bake in moderate oven

preheated to 350 degrees, for 30 minutes, or until crumbs are golden and casserole is bubbling. Makes about 6 servings.

The appetite usually fails when one is tired and overheated. A tepid shower and a rest, will make the meal more welcome, especially if it includes a crisp salad.

Montreal, then a settlement known as Ville Marie de Montreal, was granted its first civic charter by France's Louis XIV in 1644.

Paramount A FAMOUS PLAYERS THEATRE

WEDNESDAY — THURSDAY FRIDAY — SATURDAY

THE BOLD, BLAZING STORY IS ON THE SCREEN!

Daring, frank picturization of the new novel by the author of "From Here To Eternity!"

Dave arrived in town—and trouble and women were close behind.

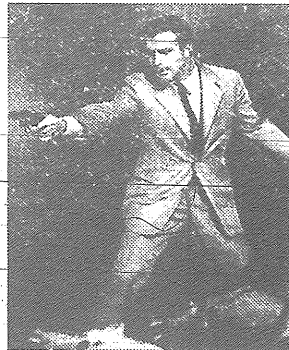

There was Ginny, the girl who followed him everywhere—and that meant trouble!

There was the pretty school-teacher who tried to resist his kisses... and that meant trouble!

There was Bama, the gambler—who pushed his luck too hard—and that meant trouble!

There was the hood from Chicago who carried a torch and a gun—and that meant trouble!

There was the night it all came to a climax—and it was real trouble that rocked the town!

**Royal Train Crew Are Old Veterans**

Among the members of the crew of the Royal Train are two railwaymen who have had many thousands of miles of experience in travelling with Regal and Vice-Regal parties.

Wilfred Notley of Ottawa, Chief Steward, and Percy Corbin, Montreal, Porter, have been on all official tours since the present cars were put into operation some thirty years ago.

Mr. Notley commenced his duties as assistant cook and has been in charge of the housekeeping duties since 1937. He has made sixty-six round trips across Canada on similar tours and many other point-to-point journeys.

In every trip the present cars have made, it has been Percy Corbin's duty to see that they are always spotlessly clean. His tasks have been made easier since the disappearance of the coal-burning locomotives.

These veteran railroaders served Her Majesty and The Duke of Edinburgh during the 1951 tour and His Majesty King George VI and Queen Elizabeth in 1939. Last year they accompanied Princess Margaret on the rail portion of her Canadian visit. They have also travelled with The Princess Royal, The Duchess of Kent and Queen Juliana of The Netherlands. They have accompanied five Governors General: Viscount Willingdon, Lord Bessborough, Lord Tweedsmuir, The Earl of Athlone, Lord Alexander and Mr. Massey to almost every part of Canada where rail will take them.

Sir Winston Churchill, Sir Anthony Eden, Lord Louis Mountbatten and former President Auriol of France have been guests in the cars while Wilfred Notley and Percy Corbin were on duty.

Leblanc-DiFrance

A very quiet double-ring wedding was solemnized on Saturday, June 27, 1959, at 5 in the afternoon in Ciudad Trujillo, Dominican Republic, between Joseph Leblanc of Kenora and Gilda DiFrance of Ciudad Trujillo.

The wedding was performed by Rev. Father Donovan of the Seabro Foreign Missions.

The bride was given away by her father Mr. Blas DiFrance, and was attended by her sister Mrs. Josefita DiFrance de Bobea.

After the wedding, a quiet reception was held at the home of Mr. Mario Bobea.

Among the guests were Mr. Blas DiFrance, father of the bride, and Olga and Anita DiFrance, sisters of the bride from Puerta Plata, Dominican Republic; Mr. Carlos DiFrance, Mr. and Mrs. Mario Bobea, Mr. and Mrs. Bayron Bobea, Aida Bobea.

After the reception, the happy couple went to their apartment in Ciudad Trujillo.

The groom is the son of Mrs. G. Leblanc of Kenora, and is working in Ciudad Trujillo for Mineray Beneficiadora Falconbridge Dominicana, C. por A., a subsidiary of Falconbridge Nickel Mines Limited.

Around Town

Misses Ethel and Verna Stokes are presently vacationing in Montreal. They will visit friends in Niagara Falls and Toronto before returning home.

Miss Gail Milsom, daughter of Mr. and Mrs. R. Milsom of Kenora, received her Certified Nurse's Assistant diploma at the graduation exercises held at Fort William on Friday. Miss Milsom will return to Kenora this week.

ZULESKY

Mr. and Mrs. Walter Zulesky are happy to announce the birth of a son on July 7th at the Kenora General Hospital.

BLACKBURN

George and Dorothy Blackburn (nee Lavergne) are happy to announce the birth of their second son, Randy Peter at St. Joseph's Hospital on July 1, 1959. A brother for Georgette, Denise and Allan. Deepest appreciation to the doctors and nurses who helped especially Dr. Torrie, nurses Misses Leaky, Zabloski and Sykora.

Freeze Fruits Now For Winter Treats

With home freezers in as general use today as refrigerators themselves, became only a few short years ago, freezing foods while in good supply, for use throughout the remainder of the year, has become an accepted and important part of many household routines. Beginning with the perennial favourite, the strawberry, the season for freezing supplies of delectable, fresh, ripe Ontario-grown fruit, for use all winter long, is at hand.

Packaging should be in sizes such that the family can use all of one package at one time. The manufacturer's instructions for use of your freezer should be adhered to closely. Thawed fruits deteriorate quickly and it is therefore advisable to use them at once. If there is unavoidable delay, keep the fruit in its container until immediately before it is to be used and keep it cold.

Thawing may be done in the refrigerator, at room temperature, or the container may be placed in lukewarm water if the fruit is needed in a hurry. The first method has the advantage of keeping the fruit cool until used. If lukewarm water is used, the fruit should be removed from the container just as soon as it is defrosted.

Jams and jellies made at intervals from frozen fruit will have a fresher flavour than those stored for a considerable time. If a batch of frozen fruit is low in quality, due to an unsuitable variety, it may be possible to use it quite successfully as pie filling or in any other way in which the fruit is cooked.

Bulletin 504, "Frozen Foods", published by the Ontario Department of Agriculture and available from local Agriculture representatives or from the information branch, Ontario Department of Agriculture, Parliament Buildings, Toronto, provides information on freezing not only strawberries and other fruits but vegetables, poultry, meats, cooked and prepared foods.

CONTRACT AWARDED FOR LAKEHEAD PORT

Winnipeg—The Department of Transport has awarded a contract to Y. W. Nelson and Sons, Port Arthur, Ontario, for the construction of V. O. R. site with access road at Lakehead Airport, Lakehead, Ont. It was announced today by W. E. Penn, Regional Director, Air Services.

The amount of the contract is \$34,550 and the completion date is September 30, 1959.

The work is to be under the supervision of Mr. L. Millidge, the Regional Construction Engineer, Department of Transport, Winnipeg.

The first transcontinental railway in the United States was completed in 1869, and in Canada in 1885.

TO THE ELECTORS OF KENORA RIDING

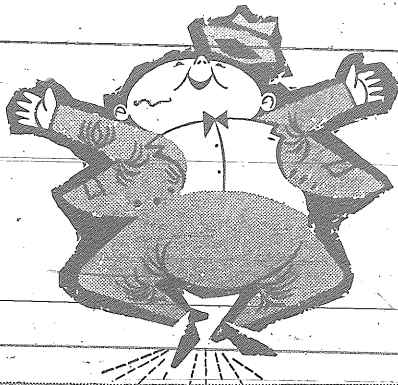

I would like to express my sincere appreciation to all the people who supported me on June 11th.

Particularly to those who worked voluntarily for me throughout the election campaign. Once again, "Thank You."

KENORA, ONT.

Shown loaded and ready to head out to the Whiteshell is the Expert Boating Clinic Mobile schoolhouse. Wishing the instructors a successful trip are, left to right, Howie Larke of Labatt's in the car, Ed McManus of Labatt's. Instructors Roy Turnock and Terry Sheppard, Whiteshell District Association President, Alan Beaven. The cavalcade heads for the Whiteshell and three weeks of instructional clinics from July 13 to August 1st.

### Boating Clinic For Whiteshell

One of the most complete mobile sound units ever assembled in Manitoba takes to the road this summer as part of the cavalcade of equipment bound for the Whiteshell. Built by Dollard Recording of Winnipeg the unit, a 1959 Plymouth Station Wagon has all the features of a sound studio. A hi-fidelity amplifier outdoor service loud-speaker horn, wide range microphone for making live announcements from the vehicle, and a high quality stereophonic tape-recorder makes up the basic equipment. The speaker units can be connected to the station wagon radio for music or special sports broadcasts, and the horn itself is a departure from the usual, inasmuch as it is capable of broadcasting either speech or music with equal clarity. The tape recorder is a three speed unit which can broadcast or record with tremendous reproduction qualities. A complete library of instructional tapes and music, completes the unit.

In addition to the sound equipment, the mobile unit carries a canoe on top, pulls a boat fitted with a powerful outboard motor making a complete instructional station on wheels. All of this equipment has been assembled for the first Expert Boating Clinic sponsored by The Whiteshell District Association and Labatt's, and is resigned to meet the ever-growing need for instruction in boating techniques and water safety.

### D. B. S. Weekly Highlights

Dominion Bureau of Statistics

**International Trade:**  
Commodity imports rose over a year earlier in May for the eighth successive monthly increase. The month's gain was over 6%. In contrast, total exports, were down 10% in value, resulting in a sharp rise in the

import surplus. To the end of May the excess of imports over exports with all countries was up to \$396,700,000 from \$170,900,000 last year, about \$51,000,000 of the increase arising from a larger import balance with the United States.

**Labour:**  
Aggregate income of paid workers in April is estimated at \$1,395,300,000, an increase of 7.4% over April last year, the gain being spread through all regions. Cumulative total for January to April showed the same percentage gain over 1957. Industrial employment index for April was above April last year as well as March this year. Average week-

ly wages and salaries showed gains in both comparisons.

**Manufacturing:**  
Steel ingot output in the week ended June 27 was at 87.2% of rated capacity, up for the second week from 83.8% in the week of June 13. April rubber consumption was a sharp 35% larger than last year. Motor-vehicle shipments in May were below a year earlier, the first decline in such comparison since last September. January to May shipments were nearly 15,000 units (mainly passenger cars) above the same 1957 period. Coal production was down about 1,500,000 tons last year from 1957 and landed imports over 6,600,000

tons, dropping the amount available for consumption more than 8,000,000 tons or approximately 25%.

**Merchandising:**  
Total sales of new motor vehicles to the end of April this year were nearly 15% higher in number than last year at 176,474 versus 154,026 units. British and European cars accounted for 10,335 of the 22,446 numerical gain.

**Mining:**  
Asbestos shipments moved upward again in May to make a five-month gain of more than 16%. Crude petroleum output in the first quarter was 10% larger than last year, and natural gas production a third larger.

**Agriculture:**  
Farm cash income in the first quarter was 6% higher than last year at an estimated \$652,000,000, the highest first-quarter figure on record. Returns from cattle were down, but nearly all other major commodities contributed to the increase.

ter, learn faster and stand the strain of experiments more easily if someone shows them a section.

So Carol was hired to pet the mice daily and to help keep them happy.

### CHURCH RULES MORE STRICT BACK IN 1784

Lake Junaluska, N.C. — Women's clothing was a matter of concern to Methodist Church leaders 178 years ago.

Among the rules adopted at the organizational meeting of the Methodist Church in America in 1784 was this one:

"Give no tickets to any that they have left off superfluous ornaments. Allow no exemptions, not even a married woman. Give no tickets to any that wear enormous bonnets, ruffles, or tings."

This was mentioned in a report by Rev. Dr. J. Mannix Potts of Nashville, Tenn., at the annual meeting of the Southern Jurisdiction Methodist Historical Society.

Another item that brought smiles was one of 12 rules adopted in 1784 for young preachers.

"Converse sparingly and cautiously with women, particularly young women."

**KITCHEN CLASSICS**

**RAREBIT O'FILETS**

Here's a tasty dinner suggestion that holds appeal in flavor and good looks, even though it bears the stamp of economy if its cost is tallied up. It's Rarebit Stuffed Fillets in which the inexpensive flaky fish fillets are molded around a peppy cheese and bread dressing. This delectable main dish is edible proof of the delightful-flavor blends that result when fish and cheese are combined in wholesome dishes.

**RAREBIT - STUFFED FILLETS**

- 4 fish fillets
- 1 tablespoon butter or margarine
- 1/2 cup milk
- 1/2 pound grated cheddar cheese
- 1/4 teaspoon paprika
- 1/4 teaspoon dry mustard
- Pinch of cayenne pepper
- 1/2 teaspoon Worcestershire sauce
- 2 cups soft bread cubes
- Grease four large muffin cups. Twirl fillets around inside of muffin cups to line them. (If necessary, trim fillets). Combine milk and butter in top of double boiler and heat. Set over hot water; blend in all remaining ingredients except bread cubes. Heat until smooth and blended. Remove from heat; add bread cubes. Spoon rarebit into fillet twirls. Bake in moderately-hot oven preheated to 375 deg. F., for 15 to 20 minutes, or until fish flakes easily when tested with a fork. To serve, loosen around fillet with knife, carefully lift with

spatula or spoon onto serving platter. Makes 4 servings.

**Summer Salad  
Suggestions**

Salad month follows dairy month as naturally as July follows June and menu-planning becomes even easier when the two are combined. Crisp, colourful vegetables with dairy sour cream dressing form an excellent basis for summer meals. Add eggs or cheese for that "something to stick to the ribs" and your main course is ready almost as fast as you can say June-July.

Fruit salad plates are in order now that home-grown fruits are in plentiful supply. Any fruit is suitable for this purpose, starting with strawberries and cherries and on through the season with cantaloupe and honeydew melons, raspberries, plums, peaches, grapes and pears. Cottage cheese or nut-rolled cream cheese goes well with the fruit-type salad plates.

Both tasty and nourishing, salads, which once were regarded as a side-dish, have long since been promoted to a place of prominence on Canadian tables and are a daily habit with most families. Salads are full of zip and may begin, accompanied, end or make a meal, according to advice from the Home Economics Service of the Ontario Department of Agriculture. Bulletin 466, prepared by nutritionists of that service and captioned "Salads—All The Year Round" is available from the Information Branch of the Ontario Department of Agriculture, Parliament Buildings, Toronto. Important points in salad making, seasoning to enliven flavour, recipes for salad dressings as well as for a great variety of salads themselves, salad accompaniments and garnishes are included in this booklet.

A good salad is cold, crisp, colourful, pretty as a picture, piled lightly in a bowl or on a plate, tasty and fit for a Queen!

**Watering  
Of Lawns**

There is no doubt that summer is the crucial period in the life of the lawn. With water restrictions in many areas, the house owner must now get the most out of what little water he can use.

Try these two lawn-watering tips suggested by horticultural specialists of the Ontario Department of Agriculture. They may lessen that "browning-off" that so often occurs in our lawns.

Soak your lawn. Water has to penetrate several inches to be effective.

If your lawn gets a sparse amount of water, grass roots grow towards the surface. This just makes them easier game for the hot, mid-day sun. What's more, shallow-rooted weeds thrive under such conditions... insufficient watering does more harm than good.

How can you determine if the lawn is soaked... Place a pan in the area to be watered. When one to one-and-a-half inches of water shows in the pan, you have applied enough.

Areas such as steep slopes and terraces can be given a finer spray, because absorption here is always slower.

Lawning Extras:  
If regulations permit, it is perfectly safe to water your lawn in mid-day. Sun injury on a freshly-watered lawn only occurs on poorly drained, compact soil. The main disadvantage in watering when the sun is high lies in the loss of water due to increased evaporation.

Many gardeners will be relieved to know that good, established turf can undergo considerable browning and still recover in the moist, cool, fall weather.

**Population  
Now 17,442,000**

Ottawa — Canada's population swelled by 2.3 per cent to 17,442,000 in the year ended June 1, the bureau of statistics reported today.

The figure represents an increase of 394,000 over the 17,048,000 reported at June 1 last year. There were numerical increases in all the provinces.

The percentage gain was down from 2.8 per cent reported in the previous 12 months, when the population rose by 459,000. Heaviest increase on record was the 3.2 per cent of 508,000 recorded in 1956-57.

Last year's increase was also below the average rise of 414,000 in the five years between the censuses of 1951 and 1956.

The bureau of statistics attributed the slackened tempo of growth to a drop in the number of immigrants—from about 183,000 in 1957-58 to 115,000 in the year ending June 1.

This was partly offset by a rise in natural increase and a small decrease in emigration.

Ontario again had the largest numerical increase—149,000 or 2.6 per cent—its population rising to 5,952,000.

**NEW TREATMENT  
FOR BURNS**

Melbourne, Australia — There have been green men around the military repatriation hospital in the Melbourne suburb of Heidelberg since doctors applied a revolutionary new method of treating severe burns and bone infections.

For the first time outside England, a new secret dye was injected recently into a patient's bloodstream. The unidentified man, suffering from chest burns, turned green as the dye circulated through the bloodstream. But the tissue destroyed by the burns retained its normal color and enabled surgeons to determine just what flesh to remove. Dr. Herbert I. Gibbs, medical superintendent, said the man turned deep green all over.
