## KEEWATIN COUNCIL HAS HEAVY AGENDA

The regular meeting of the Kewatin town council was held in the Council Chambers Monday September 14th with Mayor Walter Hodgkinson presiding. Minutes of the regular meeting held August 10th, were confirmed as read.

Mrs. Eva House appeared before Council concerning a wall which had been constructed at the edge of the road adjacent to her property which allowed runoff to accumulate on her property and due to this, Council was advised that the wall created a hazard. The matter was referred to the Board of Works for investigation in an effort to arrive at some means of correction.

A petition was received from numerous residents requesting that Council take immediate steps to eliminate the offensive odor ensuing from the Town drain which runs by their property. Council directed the Clerk to arrange with the Kenora District Health Unit to have samples taken from some of the man-holes and to bring attention to the petition which had been received. A suggestion solution received from Council was the sealing off of the man-hole on Tenth Street between Front and Ottawa Streets. The Board of Works will seal the cover as suggested.

Communications received included advice from the Secretary-Treasurer of the Board of Public School Trustees of the authorization from the architects for Progress Payments in the amount of \$44,248.90. A request from Mr. A. Bellemare for a Restaurant License was received and Mr. Bellemare was advised that Council was agreeable to the granting of a Restaurant License following receipt of approval from the District of Kenora Health Unit.

The Secretary-Treasurer of the Board of Public School Trustees advised of the Official Opening of the new Public School which has been set for Saturday September 26th, 1959 at 2:00 p.m. and outlined the Board's plans for this memorable event. Part of the ceremony will include the laying of a date stone by Mayor Walter Hodgkinson and a tour of

inspection by the public. Communications from Mrs. P. S. Jones advising of the appreciation of the writer in connection with the Municipal Ambulance Service; the Kewatin Curling Club re rink rental; the Kenora-Kewatin District High School Board concerning Kewatin's share of the 1959 levy; receipt of advice from the District of Kenora Home for the Aged concerning the share of this municipality for the 1959 levy to cover the operation of the Home and a copy of the resolutions and proposals to be considered at the Ontario Municipal Association to be held in Sudbury were all moved filed.

An application from Mr. Peter Tacknyk for the purchase of Lot

## Safe Gun Handling Course To Be Held For Young Hunters

Young hunters who are hunting for the first time this season are reminded that to obtain a licence they must produce a certificate of competence from some recognized Hunters' Safety Training course.

In Kenora, a course of this nature is sponsored by the Legion of Frontiersmen and the Kenora Conservation Club. Instruction on safe gun handling will be given at the High School range on Monday and Friday evenings at 7:30 p.m. Persons interested should contact Mr. Charlie Proulx or Mr. Charlie VanDam.

## C.A.S. Radio Play Has Fine Cast

Mrs. Veronica Kirk, who has recently returned from Banff where she took courses in theatrical work at the School of Fine Arts, is directing the Children's Aid Society's one-act play, "The Helping Hand", scheduled to be produced over radio station CJRL on Friday evening at 10:15. This play, written by Mrs. Jean McIntee for the society's annual campaign which is now in progress, has an interesting medley of characters.

In the cast there is Mrs. Jansen, a strong minded woman with a razor sharp tongue who needs help but can scarcely bring herself to receive it. There is also Miss Harris, the hard-boset social worker who has to walk a tight line between tact and her duty to the children. There is also Mr. Jansen, who makes a handsome gesture, at the end. And Billy, the Jansen's spunky son, who is vaguely loyal though

he probably doesn't understand what it is all about. And standing by, with wise counsel, is the Agency's director. Filing these roles with a high degree of competence are Mrs. Edna Stearn, Mrs. Peggie Coward, Mr. Charles Coward, Don Mastichuk and Mr. C. H. Hearn.

## GUIDES HAVE OBLIGATIONS

One day during a recent patrol two Conservation Officers made a routine check of a party fishing in Yellowgirl Bay, Lake of the Woods, and encountered a party with 9 Pickerel (Walleyes) over the legal possession limit. The fishermen said their illegal catch was due to a misinterpretation of the fishing regulations. During the first part of the conversation the guide busied himself with other things, turning his back on the Officers until he was requested to turn around and explain things.

It is the responsibility of the guide to keep his party within the law as well as keeping them safe and happy.

The guide must know the fishing and hunting regulations, and if his party is ill informed or confused he must clarify the rules for them in order that his party does not get into trouble. Merely to sit in a boat and act as a chauffeur for people who wish to go somewhere on the lake and fish, then be a cook if they happen to catch fish, is not guiding.

A guide must be a counsellor, cook, woodsman, boatman and companion. He must teach the inexperienced, check the greedy, inform the ignorant and protect the foolish.

Guiding is an honourable profession to be practised by honourable and responsible men. Men who do not qualify run the risk of being deprived of the privilege of practising it.

## Parliamentary Procedure Film To Be Shown At Preview Friday

The Kenora Film Council's preview of new films to be held at the Council Chambers Friday evening, will feature a film on Parliamentary Procedure. This should be of interest to all who belong to clubs and organizations. Also on the program will be other films of varied nature with something to suit the tastes of the entire family. The showing commences sharp at eight o'clock and all in the area are cordially invited to attend.

## RAILROADING FILM OF LOCAL INTEREST

A National Film Board "short" entitled "Railroaders", presently playing at the Paramount Theatre will prove of interest to many people of this area. Viewed by this reporter this morning, the film was especially enjoyed, since my father was a railroader and many times spoke of railroading in the "Mountain Pass" country. The setting is Revelstoke and Glacier, B.C., the scene is Winter. With excellent photography, the story is unfolded of the maintenance of the most treacherous stretch of railway in Canada. The film was an eye opener to me. In this day and age, it is hard to realize that men, not machines carry out much of the work of keeping this line clear. I thoroughly enjoyed "Railroaders", I know you will too.

One house fly can carry six million germs.

## HEALTH UNIT REPORTS ONLY 1 CASE OF POLIO

The regular monthly meeting of the Board of Health was held on Thursday, September 10th, at the unit offices, Kenora. Dr. R. J. Whitaker presided and the following members were present: Mrs. J. E. Turner, Government Representative, Mr. J. K. Forbes, Kewatin Representative, Mr. E. W. Byers, Jaffray Melick Representative, Mrs. A. G. Wood, Dryden Representative, Mr. W. R. E. Trow, Balmertown Representative, Mr. E. S. Linkletter, Kenora Representative, Miss Bernice Rowland, Supervisor of Public Health Nursing, R. D. P. Eaton, Medical Officer of Health, D. T. MacLeod, Secretary - Treasurer, D. H. Lemoine, Senior Sanitary Inspector.

The following report was presented:—

Regular clinics have been held in all centres with average attendance for the summer period.

One case of paralytic poliomyelitis in an adult male was reported from the Ear Falls area. This has not as yet been confirmed on a laboratory basis. No quarantine was practised since the quarantine period had elapsed after admission to hospital and before the diagnosis was made, and the case notified to the Health Unit.

In general there has been no great incidence of poliomyelitis in the surrounding geographic area. Manitoba's totals have been markedly less in 1959 than in 1958 for the same period. In Ontario although the totals are over double those for the same period of 1958, the figures are low. To the south of us in Minnesota there has been an upswing in notification towards the end of the month but again not to a serious level.

Despite these somewhat reassuring signs for this particular locality the Health Unit would like to point out yet again the desirability of all people taking advantage of poliomyelitis immunization, either from their own doctor or through one of the Health Unit clinics.

The tuberculosis situation has been relatively quiescent in recent months though the x-ray installation at the Kenora goal continues to turn up new cases. The value of this installation has been proved over and over again in the time that it has been operating.

Considerable difficulty has been experienced this year by

camp owners and operators in that very many of them have, for the first time, had adverse water reports. Many of these camps are quite remote, and the reason for the apparent pollution has not always been clear.

Probably it would seem that much of the trouble has resulted from the extremely heavy rains experienced this summer. Although the total rainfall may not have been greatly above normal its character has been such that a large volume of water has been dumped in a short time with the result that the water instead of soaking into the ground has run off the top carrying with it all the surface contaminants from birds and beasts in the area. These adverse water results, which have come in all cv-

(Continued on Page 10)

## More Local Development

In keeping with the Progressive Conservative Federal Government's policy of more development throughout Northwestern Ontario, it was learned today that tenders would be called some time next week for the construction of Three Double Staff Dwellings, Type C-74, One Single Staff Dwelling, Type C-36 and related work at Kenora, Ontario. This will all aid in helping to supply more jobs for this area.

## "His Brow Was Wet With Honest Sweat"

Most people will remember the above quotation from their schooldays, but few would imagine that the following situation could be dangerous.

One hot day recently, Oscar Goulet who is an operator for the Dryden Paper Company, sat down on a mossy area, removed his glasses and placed them on the ground while he wiped the sweat from his brow. Oscar reports that within one minute a little fire had started caused by the sun's rays on his glasses. The fire was extinguished promptly but the plastic frame of his glasses was badly scorched.

ing names of Tourist camps that have had unsatisfactory water tests. To date we have received the names of 86 camps and they are being rechecked from this office as time allows. Some of the rechecks done showed improved results which indicates the pollution was of a temporary nature. Faulty operation of chlorinators was another factor while still others show continued pollution.

A series of samples taken of Laurenson's Lake at the dock of Hertz Cabins showed the area to be heavily polluted so the area was placarded as unfit for swimming.

Routine tests were continued on the bathing beaches at Rabbit Lake, Coney Island, Lakeside Park and Kewatin Park in the Kenora area, also Johnston's Beach and the D.A.R.C. deep pool in the Dryden area.

### Sewage Disposal:

There were 21 permits issued for septic tank installations during August - 15 in the Kenora area and 6 in the Dryden district. Six complaints were received and 59 inspections made concerning private sewage disposal system.

Closure action was taken on a trailer-tenting camp in the west highway due to lack of proper sewage disposal facilities.

Information was laid against a Winnipeg resident who works this area pumping out septic tanks. The court case is still pending.

### Refuse Disposal:

Routine inspections were made of the municipal disposal grounds in the area. The dumps in the rural areas continue to be troublesome as no supervision or maintenance programme is in effect and all neighbouring campers disclaim any responsibility for same.

### Summer Camps:

Two routine inspections were made of summer camps in the area. This completes the camp inspections for the year. One camp reported on was not seen.

due to the short duration of the camp.

### Complaints:

There were 24 complaints received concerning Tourist camps, nuisances, private sewage disposal and water supplies.

### Interviews:

There were 43 interviews made with persons concerning sanitation matters and problems.

Number of inspections made: Mr. Lemoine - 106 - Mr. Haken-son - 57 - and Mr. Pitt - 67.

### Health Unit Reports Only 1

(Continued from Page 1)

er the Health Unit area serve to point the lesson that no surface water supply is to be considered safe at all times without benefit of chlorination or boiling.

Total - 29

### SANITATION REPORT

The following is a report of activities in the sanitation field for the month of August.

### Food Control:

There were 17 routine inspections made of eating establishments in the Kenora area and 14 in the Dryden area. One restaurant in Dryden and one in Kenora received written notification for immediate clean-up, otherwise conditions were found to be generally satisfactory.

There were 104 swab tests taken of eating and drinking utensils with 34 tests reported as having high plate counts and 2 with a coliform count. Swab tests were also taken of beverage room glasses with results showing 2 positive for coliform organisms and 8 with excessive plate counts.

The routine annual chest x-ray of all food handlers will be held in September.

### Milk Control:

There were 79 samples of pasteurized milk and milk products taken for analysis with the following results:

	Sat.	Unsat.
Co-op	16	3
Groveside (Dryden)	22	2
Lakeland	14	4
Lucerne	11	7
Total	63	16

The above results give an average of 80% satisfactory. There were 14 samples reported as containing minimal amounts of E. Coli.

Raw milk samples were collected from 32 producers shipping to Groveside and from 36 producers shipping to Co-op Dairy. The results averaged 85% satisfactory. Two shippers were suspended due to poor tests.

### Water Supplies:

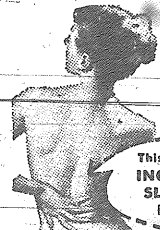

There were 79 water samples taken during August with 13 from public supplies, 42 from private supplies, 1 from schools and 14 from bathing beaches.

Numerous complaints were received from Norman residents concerning the filthy, foul-smelling water that was coming out of the taps. The water intake was inspected by the Town Engineer's office with negative results and despite serious efforts put forth by the Town to correct the situation, the problem remains unsolved.

Other municipal supplies were found to be operating satisfactorily as confirmed by routine water sampling.

A number of lists have been sent to us from the Department of Travel and Publicity contain-

## LAWN BOWLING

To be or not to be that is the question. I will answer that question, it is to be a BEE, as a matter of fact it is to be three BEES. 1st, a threshing bee to gather next year's crop of marshmallow vines, 2nd, a dirt bee to summer fallow the south greens with soil from the eyesore corner and 3rd, a nursery bee to distribute the bushes from the gate to the four corners of the greens, that is the male BEES job. Now the queen BEES could clean up inside the club house and all have clean minds.

There are just a few game events to be finished. We should be able to close by October 1st. Ladies singles, men's singles, and Mr. and Mrs. events. Speaking of the Mr. and Mrs. there were grounds for divorce or bigamy in this event, our men chasing around with other men's wives, male members openly soliciting. I'll go with Mrs. so and so. Only two couples were within the law. Another thing, yours truly, in the last game I was allowed to compete, the opposing rink had a substitute skip I won the first two ends. This notorious skip bowls, my hand won't grip or hang onto the bowls, so I loaned him some grippo. That did it, I supplied the means of remedy. What happened? I did not win another end and lost the game. The moral, don't do unto others unless you want to get done. So

no more grippo to opposing skips, my grippo will be used only for the ladies. I just love gripping the ladies.

I will close this epistle with. Today is here. I will start with a smile, and resolve to be agreeable. I will not criticize. I refuse to waste my valuable time. Today I refuse to spend time worrying about what might happen. I am going to spend my time making things happen. Today I am determined to do things I should do. I firmly determine to stop doing things I should not do. Today I will stop saying, "If I had time," for I never will "find time" for anything. If I want time I must make it.

Bye for now, and God Bless You.

Bill Watkinson.

## Northern Pike To Salvage Ontario Fishing Pressure

The Great Northern Pike (*Esox lucius*) "may be the salvation of Ontario's tourist fishing industry," tourist outfitters and operators suggest. Faced with tremendously increased fishing pressure both from Canadians and visiting Americans, experts say that it would be impossible to completely stock all available fishing waters through hatchery, or even natural processes with such game fish as speckled trout, lake trout, bass, maskinonge and pickerel. But the pike, some of which grow to 30 pounds or better - stand up to the fishing pressure and even seem to be on the increase, according to reports.

Most Ontario fishermen, particularly those in southern Ontario, scorn the pike as a spineless coward who gives up without a struggle. This is not true of the Great Northern, found where the waters are deep and cold. U.S. fishermen travel as much as 1,500 miles for pike fishing in Ontario and enjoy every minute of it.

Indicative of this, according to Ontario Department of Lands and Forests observers, is the check which they have carried out in the Fort Frances District in far northwestern Ontario where the maskinonge and black bass are particularly numerous and where the famous waters of Lake of the Woods are the mecca for thousands of mid-western U.S. visitors annually.

Questioning of about 600 non-resident anglers revealed that pike are led in numbers taken (1,500) with northern pike second (823). The pike feeds mainly on other fishes, including smaller pike, but will also take water insects, crayfish, frogs, mice, small muskrats, ducks and small mammals. Most are caught, however, on artificial baits of almost all type.

## CLASSICAL MUSIC IS IMPOSED

**KANSAS CITY, Kan.** - The loudspeaker system at Shawnee Mission High School is delivering classical music to students instead of academic announcements.

Football players scrimmage to Bach and Beethoven.

It's not intentional! School officials discovered the loudspeaker system is picking up the broadcasts of an FM radio station whose transmitter is just 500 yards from the school.

# The Acceptance Of A Disability

by Dr. Harvey Doney  
of the Workmen's Compensation Board of Ontario

Any disability that obliges a person to change his trade or occupation, is a major disruption in the eyes of the sufferer. To bring a man to accept his disability and make the most of what is left is the real core of rehabilitation. No matter how extensive a disability, no matter how handicapped an individual may appear to be today, he may be returned to society and to useful living. With the co-ordinated efforts of a group of specialists, he can in most cases be made

well enough to resume his family life and once again become a useful personality in his community and in his business life.

This is possible but by no means true of every handicapped person. No matter how skilful and patient the surgeons, the nurses, the brace makers, the therapist, the counsellors or the teachers, their efforts are of little avail if the handicapped person is not prepared to accept his disability.

Accepting a disability means starting life over again with modified objectives and aspirations because one must now work

with a different set of "tools". To a man who, prior to his accident, was well established socially, economically and vocationally, this does not present the same problem as it does to persons with an unstable personality, disrupted family ties, with little or no education or training and with a low level of economic aspirations. These latter are the more difficult problems.

University graduates present fewer problems in rehabilitation. They will return to useful living, will soon become employed and, in some cases, will be earning more money than was the case before the accident.

The untrained laborer presents a different picture. He may be a recent immigrant to Canada, speaking little or no English, who has always earned his living as an unskilled labourer on construction work, in the mines, or in the forests. These occupations demand physical fitness and, to the injured man, his disability appears to block all hope of future work. He cannot think beyond his disabilities sufficiently to realize that there still remain many abilities to be used. If he is also the sole support of a large family his worries are magnified many times over.

These patients develop severe persisting complaints, often attributed to anxiety and hysteria and their hospitalization lasts far beyond what one would ordinarily expect from the original injury. The man is afraid to leave the security of hospital for the uncertainty of going back to work.

No set formula has been found for universal acceptance of a disability. Some people are unable to accept even minor disabilities or adversities in their lives, while others seem able to find worthwhile things even in the midst of catastrophe.

An infirmity can bring out the best that is in a person or it can bring out the worst. Beethoven and Braille, and a host of others rose to heights of accomplishment that might have been impossible for them had they not been challenged by a disability.

Rehabilitation starts as soon after the accident as possible, in the active treatment hospital. It is then carried on in the convalescent hospital and finally into the community itself. It involves internists, surgeons, nurses, physical and occupational therapists, social workers, psychologists, psychiatrists and religious counsellors. Vocational counselling has also been added, covering training in academic or commercial subjects, industrial arts, physical education or one of the various trades. Training in speech, music and

social sciences is also given. The family and associates of the injured man must consider his abilities rather than his disabilities. They must not be constantly trying to help him, but grant him the privilege of being independent and let him do things for himself, even if it is a long and laborious task. He has worked hard to be able to take care of his needs for daily living. He must be constantly encouraged to use these skills, and to lead a normal social life in clubs and similar social outlets. Even more important, his employer must also assess the man in terms of what he is able to do rather than what he cannot do, and make every effort to get him working as soon as possible on a job that utilizes his abilities.

Pears do not freeze well, and peaches and apricots need special treatment to prevent discoloration.

Water content of apples is about 80 per cent.

Line the bottom of the canary's cage with aluminum foil to keep it clean.

## Lois Anne Larouche Honored At Shower

Miss Lois Anne Larouche, R.N., a bride-elect of Saturday, September 14th, was honored at a miscellaneous shower held in the Norman Community clubhouse on Thursday, September 10th. Miss Larouche's wedding to Mr. Patrick Joseph Doyle will take place in St. Patrick's Cathedral, Fort William.

The guest of honour was escorted through the gaily decorated hall to the bride's chair which was suitably decorated for the occasion. She was then presented with a lovely corsage as was her mother Mrs. E. Larouche.

The many lovely gifts were presented by little Miss Dorothy Plante for which the bride-elect thanked all in a few well chosen words.

Tea was served from the prettily appointed table, covered with a lace cloth. A low bowl of autumn flowers, flanked by lighted candles centered the table. Presiding over the tea cups were Mrs. L. Lalonde and Mrs. A. J. Plante, aunt of the bride.

Guests numbered one hundred.

## MANDO DECLARES CASH DIVIDEND

MINNEAPOLIS, MINN.—The board of directors of Minnesota and Ontario Paper Company today (Sept. 15) declared a quarterly cash dividend of 40 cents on each share of the capital stock. The dividend is payable Nov. 1, 1959, to shareholders of record at the close of business Oct. 2, 1959.

## Instruction Course On Audio-Visual Equipment, Oct. 30

A weekend course of instruction in the care and use of audio-visual equipment was announced recently by the Northwestern Ontario Film Federation. It is to

be held at the Quetico Conference and Training Centre on the weekend of October 30th. Last Fall a similar course was held attended by some 20 people from a wide area of Northwestern Ontario, all of whom were responsible for handling, use and maintenance of a variety of audio-visual equipment.

The coming course is being designed on the basis of last year's course with modifications based on recommendations from last year's attendants and will be adapted to meet the needs of those who register for this year.

Whereas emphasis is placed on a fairly detailed understanding of the theory of equipment and on its care and maintenance - filmstrip projectors and 16 mm. motion picture equipment of several makes - other ancillary pieces are considered in some detail.

In addition to the problems of equipment the course will cover some elements of the effective use of films and filmstrips, the procurement of films and film sources for various programmes.

The course is open and available to anyone in Northwestern Ontario who is operating any of the pertinent equipment or who is interested in the information available.

## Keewatin Council Has Heavy Agenda

(Continued from Page 1)

Plan M.269 was referred to the Finance Committee of Council for investigation and recommendation. A communication from the District of Kenora Magistrate's Court contained a cheque in the amount of \$59.84 to cover this municipality's portion of fines for the month of August 1959. Accounts totalling \$31,438.64 were received and authorized paid.

A request from Mr. P. Barnes for the opening of a portion of Fifth Street was referred to the Board of Works. The Clerk advised Council that the inspection by Mr. S. J. Borgford of the Municipal Skating Rink had been completed regarding stresses and construction but to date a full report had not been received.

## Summer Lumbering Operation Shows Big Increase

Summer lumbering operations are increasing in Ontario, especially in hardwood timber types, according to officials of the Ontario Dept. of Lands and Forests.

For many years, logging was regarded as a winter operation, but the move to summer work is favourably regarded by foresters and company officials alike.

"It means steady employment the year round," one pointed out, "for cutters, skidders and truckers. In many hardwood forest types, including yellow birch, summer operations 'scatify' the duff on the forest floor much more than winter operations. This produces a seed bed more receptive to seed blown by the wind from trees left standing. This ensures a higher rate of natural reproduction."

"In favour of the all-year operations, also are the obvious economies obtainable from maintaining access roads regularly instead of seasonally, avoiding seasonal closure and reopening of camps and releasing and re-hiring men."

## CARS DEADLIER THAN FALLOUT

REGINA — Radioactive fallout from Nuclear tests presents a definite hazard to health, but a small one compared with other dangers of everyday life, the mine ministers' conference in Regina was told Monday.

Dr. J. W. T. Spinks, who will take over as President of the University of Saskatchewan in November, said more people were killed in traffic accidents than would ever die from Radiation effects.

'Up front is where I need protection' Says Dick Shatto.

The versatile Argonaut backfielder was talking about winter protection for his car. "Prestone Brand is the only anti-freeze that gives me complete protection up front in the cooling system of my car. Sure it protects against frost, foaming and clogging—but that's not all—not by a long shot," said the Big Four star. "Prestone Anti-Freeze with magnetic film stops rust and corrosion, too."

"Dick has been well drilled in the signals to call when he asks for anti-freeze. Only with 'Prestone' Brand Anti-Freeze does he get magnetic film which coats every rubber and metal surface in a car's cooling system. That's why he insists on 'Prestone' Anti-Freeze. You do the same and make sure that's what you get by looking for the distinctive Green Tag which will be attached to your radiator."

"Would you like to buy some cookies?" will be the refrain heard Friday and Saturday when local Girl Guides and Brownies carry out this annual event, the sale of special boxes of cookies. Proceeds will be used to further the work of Guiding.

Judy Van Walleghem, the smiling Brownie pictured above had the honor of selling the first box of cookies to His Worship Mayor Peter Ratuski of Kenora.

Judy, daughter of Mr. and Mrs. L. Van Walleghem is a member of the 2nd Kenora "A" Pack.

## Urge Young Deer Be Left Alone

If you find a fawn or calf moose in the bush around the cottage, leave it where you found it. Don't touch it or disturb it. The mother will return.

That is the warning of officials of the Ontario Department of Lands and Forests who point out fawns and calves are hard to rear and unauthorized persons can be prosecuted for having possession of them.

"Female deer or moose normally feed their young, then leave them 'frozen' to rest while the doe or cow herself goes off to get food and water for herself. Instinct or habit usually keeps the calf or fawn in the spot where it was left so that the mother will find it where she left it when she returns for it—as they always do," the officials said.

A gander that reached age 60 is the oldest member of the Canada geese species on record.

**LONDON** — Dr. Werner von Braun, head of the U.S. Army's missile program, said Monday night it would not surprise him if the Russians try to launch a man into space during Premier Khrushchev's U.S. visit.

The Russian leader will arrive in the United States Sept. 15.

"The Russians have a great sense for drama," said the German-born scientist.

Von Braun said the U.S. has its own definite schedule for putting a man into space—"but it would not be right for me to divulge at what date that will be."

**SPENT LARGE SUM**  
The publicly owned Canadian Broadcasting Corporation, which operates 26 of Canada's 203 radio stations and eight of the country's 49 television stations, spent a record \$87 million last year.

The largest meteorite ever recovered in Canada; made of iron and weighing 356 pounds, was found at Iron Springs, Alberta, in 1869 and is now displayed at Toronto's Victoria College.

JAMES G. DUNCAN

James G. Duncan, F.C.A., of Edmonton has been elected president of the 8,500-member Canadian Institute of Chartered Accountants at the 57th Annual Conference, now being held in Vancouver. He succeeds J. L. Helliwell, F.C.A., of Vancouver. A member of the profession since 1937, Mr. Duncan was named a fellow in 1953 and has served five years on the Institute's executive. He is a senior partner with Deloitte, Plender, Haskins and Sells, Edmonton.

J.A. Wilson, F.C.A., of Toronto and G. W. Hudson C.A., of Moncton were elected first and second vice-presidents respectively. J. Hyslop, C.A., of St. John's, Newfoundland, J. W. Abbott, F.C.A., of Winnipeg and H.I. Ross, C.A., of Montreal were appointed regional representatives. D. A. Ampleford, F.C.A., of Toronto was re-elected treasurer.

### Pumpkin - Autumn's Golden Emperor

In China, the pumpkin is the symbol of fertility, health and prosperity and is called the 'emperor of the garden.' In Burma, there is an ancient myth that says after the pumpkin was created, the spirits came down and, one by one, added new characteristics to it until man himself evolved - not from a monkey but from a pumpkin.

In Europe, in the ninth century, the Abbott of Reichenau wrote a Latin poem about a little garden, in which he said about the "pompon."

" - with what grace From the slender long stem it hangs down in its place And then from its delicate neck there sails out What a body, prodigious, vast, wanton and stout."

Until the eighteenth century, France honoured the pumpkin by a market feast in Paris wherein the largest pumpkin was crowned with a tinsel crown, then cut up and auctioned off.

When the early French and English explorers and settlers came to Canada, they saw corn, beans, squash and pumpkins growing together in the Indian settlements. The corn was entirely new to them, but they thought they recognized the squash and pumpkins, so they called the pumpkins after the pompons of France. In actual fact, the Canadian pumpkins are,

to this day, larger and finer than the Old World pompons and really were as new in the experience of the Europeans as was corn.

There is an old Indian legend which tells about one of the settlers who started to farm one summer across the river from an Indian winter encampment. When the Indians returned, the chief sent his wife over to borrow a pumpkin. She returned

without one. The chief was very angry. Soon the settlers rattled up in a wagon loaded with pumpkins. When the chief started to splutter with annoyance about the slight to his squaw, the settler replied: "I ain't no one pumpkin man!"

While the Indians baked pumpkins in their campfires, and saved the roasted seeds to munch on like nuts, and the new settlers quickly learned to boil up

pumpkins like applesauce and serve the sauce with meat. After this, it was only a short step to sweeten and spice the pumpkins for dessert. Pumpkin pie had become so famous in the New World that even before the Civil-War, Josh Billings wrote that the man who doesn't like pumpkin pie wants "watching kluss, for he means to do somethin mean the first good chance he kan git."

In the pioneer days, pumpkin pies were rich with eggs. Today, we have devised special pumpkin pie recipes which require no eggs as well as the more conventional ones. The tinned pumpkin, which saves all the work of cutting up and peeling the hard gourds, and then of boiling the pulp till the moisture almost disappears, is widely available, inexpensive and extremely convenient.

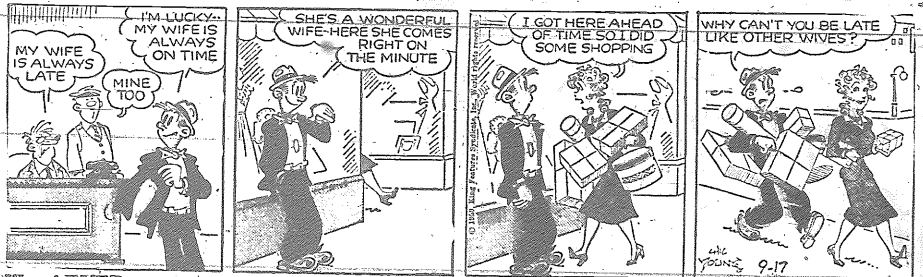

### THERE'S A LITTLE COP IN ALL OF US

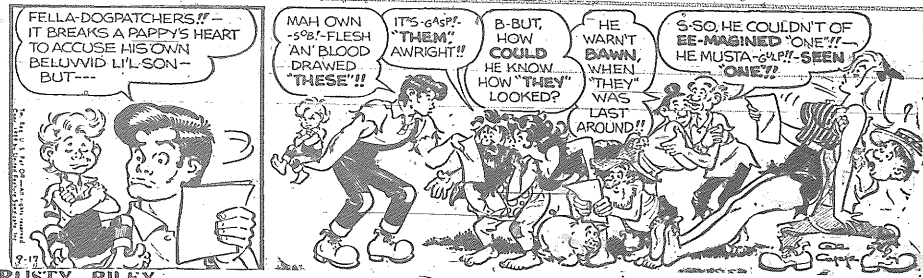

A traffic light failure at a busy intersection in Toronto brought out the latent traffic cop in Alfred Vermescher, an electronics engineer. Spotting the breakdown, he jumped out of his car and spent the next 20 minutes

waving traffic to and fro. Why? "Oh, I just thought I could help it," said Vermescher. In khaki shorts and a sportshirt he made signals that kept the cars moving smoothly without any frayed tempers or tangled bumpers

**Carpet Cues For Better Wear**

Learning the shortcuts of carpet care may not qualify you as a genius. But you'll feel clever when you reckon the savings in short temper as well as money. To help you, home economists have devised carpet tricks — almost as good as those in the Arabian Nights. These labor-saving, fibre-saving ideas may not raise your carpets aloft — but they'll give you a definite lift.

For instance: sprinkling salt on rugs before vacuuming them will loosen the soot, insure a

more thorough cleaning job. A hot iron on a damp cloth will make pile spring again in spots where furniture has crushed it — and flatten curling corners. Dull spots caused by furniture pressure can be removed with a bit of French chalk. Rub it into the spots with a small brush, then run the vacuum over the area. Is there any way to prevent these dull, crushed spots? Try putting cups under chair and sofa legs — and move the furniture around whenever the redecorating spirit hits you! It's good for the carpet. Turn rugs around, too — at least twice a year, advises the Bissell Home Service Institute. Rubber pads under the rugs and scatter rugs placed in front of chairs and TV sets are other good ways to avoid scuff and groove marks.

But these tricks won't do much good without a regular carpet-cleaning program. Imbedded dirt particles not only dull color, but work like tiny knives to cut carpet fiber.

A quick daily brush with a carpet sweeper removes dirt before it's ground in, fluffs up the nap to attractive softness. This simple chore can be made even easier with a new curved-handle carpet sweeper. This permits a more natural, comfortable arm motion while you're doing the job.

It's a good idea, too, to vacuum your carpets once a week in order to root out any dirt missed by the sweeper and to keep the pile fluffy. "Through," in this case, means at least seven strokes over every foot of the surface.

Small rugs should not be flapped out of windows or doors to rid them of dust. Such treatment is likely to break the yarns in the backing — as is the practice of rug-beating. Better stick to the carpet sweeper and the vacuum cleaner.
